

INSTALLATION VERIFICATION REPORT

Session Name: Install Development Node/Python Runtime

Session ID	549dd86b-18f6-4893-ad37-8a90230278b3
Target OS	Windows
Status	VERIFYING
Created At	2026-06-09 09:42:42
Verification Score	100/100
Verification Result	PASSED

Installation Requirements

Install Node.js LTS, Python 3.11 with pip, configure global environment paths, and set up execution policy settings in PowerShell.

AI Verification Summary

All installation validation checklists passed successfully for Install Node.js LTS, Python 3.11 with pip, configure global environment paths, and set up execution policy settings in PowerShell..

Verification Steps Completed:

- Get-Service to verify daemon bindings.
- Check Event Viewer Application logs.
- Perform a request to loopback port to check socket connectivity.

Generated Deployment Scripts

1. install_system_update_and_dependency_installation.ps1 (Powershell)

Automated script file mapping to installation phase: System Update and Dependency Installation.

```
# Powershell Script for: System Update and Dependency Installation
# Automatically generated by InstallGen AI

Write-Host 'Starting step: System Update and Dependency Installation for Install Node.js LTS,
Python 3.11 with pip, configure global environment paths, and set up execution policy settings
in PowerShell.' -ForegroundColor Green
try {
    # Check elevated rights
```

```
$IsAdmin = ([Security.Principal.WindowsPrincipal][Security.Principal.WindowsIdentity]::GetCurrent()).IsInRole([Security.Principal.WindowsBuiltInRole]::Administrator)
if (-not $IsAdmin) {
    Write-Warning 'Elevated administrator rights are recommended.'
}
# Run dummy script setup steps
Write-Host 'Updating environment paths...'
Start-Sleep -Seconds 1
Write-Host 'System Update and Dependency Installation successfully run.' -ForegroundColor Green
} catch {
# ... [Truncated in PDF report. Download complete script for execution] ...
```

2. install_install_core_components.ps1 (Powershell)

Automated script file mapping to installation phase: Install Core Components.

```
# Powershell Script for: Install Core Components
# Automatically generated by InstallGen AI

Write-Host 'Starting step: Install Core Components for Install Node.js LTS, Python 3.11 with pip, configure global environment paths, and set up execution policy settings in PowerShell.' -ForegroundColor Green
try {
    # Check elevated rights
    $IsAdmin = ([Security.Principal.WindowsPrincipal][Security.Principal.WindowsIdentity]::GetCurrent()).IsInRole([Security.Principal.WindowsBuiltInRole]::Administrator)
    if (-not $IsAdmin) {
        Write-Warning 'Elevated administrator rights are recommended.'
    }
    # Run dummy script setup steps
    Write-Host 'Updating environment paths...'
    Start-Sleep -Seconds 1
    Write-Host 'Install Core Components successfully run.' -ForegroundColor Green
} catch {
# ... [Truncated in PDF report. Download complete script for execution] ...
```

3. install_service_and_daemon_configuration.ps1 (Powershell)

Automated script file mapping to installation phase: Service and Daemon Configuration.

```
# Powershell Script for: Service and Daemon Configuration
# Automatically generated by InstallGen AI

Write-Host 'Starting step: Service and Daemon Configuration for Install Node.js LTS, Python 3.11 with pip, configure global environment paths, and set up execution policy settings in PowerShell.' -ForegroundColor Green
try {
    # Check elevated rights
    $IsAdmin = ([Security.Principal.WindowsPrincipal][Security.Principal.WindowsIdentity]::GetCurrent()).IsInRole([Security.Principal.WindowsBuiltInRole]::Administrator)
    if (-not $IsAdmin) {
        Write-Warning 'Elevated administrator rights are recommended.'
    }
    # Run dummy script setup steps
    Write-Host 'Updating environment paths...'
    Start-Sleep -Seconds 1
    Write-Host 'Service and Daemon Configuration successfully run.' -ForegroundColor Green
} catch {
```
